Who proposed that a power similar to magnetism existed in humans?

- Franz Friedrich Anton Mesmer
- Philippe pinel
- Galen
- Plato

## Most Important & Repeated Mcqs Midterm PSY101

Social phobia is characterized by \_\_\_\_\_.

- A fear of people
- A fear of rejection
- A fear of social situations
- A fear of social isolation

Which one is NOT a type of schizophrenia?

- Disorganized type
- Catatonic type
- Paranoid type
- Differentiated type

Which model of psychotherapy consists of Systematic de-sensitization and contingency management?

- Biological
- Family and couples.
- Behavioral
- Cognitive

Which one of the following is not a secondary/learnt motive?

- Achievement
- Power
- Hunger
- Curiosity

\_\_\_\_\_ are enduring dimensions of personality characteristics that differentiate a person from others

- Behaviour
- Personality
- Traits
- All of the given options

## Most Important & Repeated Mcqs Midterm PSY101

In \_\_\_\_\_ defense mechanism, a person reverts back to a stage that was satisfying.

- Sublimation
- Repression
- Denial
- Regression

Hunger, thirst and sleep are the \_\_\_\_\_.

- Learnt motives
- Primary motives hunger, thirst, need for sleep, air, excretion
- Social motives
- None of the given options

Secondary motives are also known as which of the following?

- Psycho-social motives
- Biological motives
- Psychological motives
- Emotional motives

Who among the following talked about the “cognitive maps”?

- Tolman
- Skinner
- Thorndike
- Maslow

Which of the following is the main contribution of Kohler in the Gestalt School?

- Learning by Insight
- Learning by Imitation
- Learning by Trial and Error
- Learning by Conditioning

Organized bodies of information stored in memory are called what?

- Norms
- Cognitions
- Schema
- Traits

## Most Important & Repeated Mcqs Midterm PSY101

A correlation is a numerical measure of the \_\_\_\_\_.

- Unintended changes in participant's behavior due to cues from the experimenter.
- Behaviors of participants of different ages compared at a given time.
- Behaviors of participants followed and periodically assessed over time.
- **Strength of relationship between two variables.**

An adjustment in the lens shape in order to keep images in sharp focus is called:

- Lens-image inversion
- Top-down processing
- **Accommodation**
- Optical adaptation

\_\_\_\_\_ of the following perspectives would be associated with free will.

- Behavioral
- Psychodynamic
- Biological
- **Humanistic**

In the statement "Critical thinking requires reasoned judgments," the word reasoned means \_\_\_\_\_

- Giving it a lot of thought
- Seeing one side of an argument very clearly
- Focusing on opinion
- **Logical and well thought out**

Critical thinking means making judgments based on \_\_\_\_\_.

- Emotion
- Authority and expertise
- Keeping a closed mind
- **Reason and logical evaluation**

## Most Important & Repeated Mcqs Midterm PSY101

A researcher stops people at the mall and asks them questions about their attitude toward gun control. Which research technique is being used?

- Survey
- Experiment
- Naturalistic observation
- Case study

In which of the following type of learning, an association is formed between a behavior and a consequence?

- Classical conditioning
- Operant conditioning
- Modeling
- Observational learning

Which of the following psychologist would argue that a criminal engages in unlawful behavior because he grew up around older boys who engaged in criminal activities?

- Behaviorist
- Psychoanalytic
- Functionalist
- Structuralist

The rate at which food converts into energy and then is expended by the body is known as what?

- Metabolism
- Deuteranopia
- Calcitonin
- Oxytocin

)An adjustment in the lens shape in order to keep images in sharp focus is called:

- Lens-image inversion
- Top-down processing
- Accommodation.
- Optical adaptation

## Most Important & Repeated Mcqs Midterm PSY101

A researcher stops people at the mall and asks them questions about their attitude toward gun control. Which research technique is being used?

- Survey
- Experiment
- Naturalistic observation
- Case study

What two categories of dream content did Sigmund Freud described?

- Latent and manifest
- Poetic and realistic
- Delusional and hallucinatory
- Literal and symbolic

A German psychologist Wolfgang Kohler was one of the first psychologists who observed which of the following phenomenon?

- Deductive reasoning
- Inductive Thinking
- Insight
- Trial and error

All of the followings are the features of Unconscious EXCEPT:

- Instinctual drives
- Perception
- Desires
- Infantile wishes

Which part of brain controls positive emotions?

- Limbic system
- The right hemisphere – Negative emotion
- Cerebrum
- The left hemisphere – Positive emotion

## Most Important & Repeated Mcqs Midterm PSY101

Which one of the following is not a secondary/learnt motive?

- Achievement
- Power
- **Hunger**
- Curiosity

With regard to the types of concepts; which of the following concept is known, familiar and relatively simple concept?

- Artificial
- **Natural**
- Prototypes
- Prolonged

Which branch of psychology studies cognition, related areas and issues?

- Thinking psychology
- Experimental psychology
- Developmental psychology
- **Cognitive psychology**

According to Jung, which of the following is the energy for personal growth and development?

- Archetypes
- Superiority complex
- **Libido**
- Neurotic needs

A rectangle has two opposite sides equal, if it is not the case, then it is not a rectangle. This is an example of which of the following type of concept?

- **Artificial**
- Prototypes
- Natural
- Prolonged

## Most Important & Repeated Mcqs Midterm PSY101

All of the followings are the features of Unconscious EXCEPT:

- Instinctual drives
- Perception
- Desires
- Infantile wishes

Which memory system provides us with a very brief representation of all the stimuli present at a particular moment?

- Sensory memory
- Short-term memory
- Long-term memory
- Primary memory

The ability to produce solutions to problems that are unusual, inventive, novel, and appropriate is called \_\_\_\_\_.

- Insight
- Creativity
- Heuristics
- Latent learning

Laws of perceptual organization were proposed by which of the following school of thought?

- Functionalism
- Structuralism
- Gestalt school
- Behaviorism

Today psychology is considered as the scientific study of which of the followings?

- Mind
- Conscious experiences
- Behavior and mental processes
- Soul

## Most Important & Repeated Mcqs Midterm PSY101

Who among the followings is known as “father of Greek medicines”?

- Socrates
- Plato
- Aristotle
- Alcameon

Who among the followings regarded as the “Father of Medicine”?

- Hippocrates
- Kraepelin
- Plato
- Socrates

Who among the followings is the author of the book “The Origin of Species”?

- Emil Kraepelin
- Paul Broca
- Wilhelm Griesinger
- Charles Darwin

Which of the following is incorrect about insulin-shock therapy?

- In this therapy the coma is caused because of a reduction in blood sugar level.
- It has found to be effective with schizophrenics, addicts etc., if used with psychotherapy.
- It was developed by Paul Broca who was a French surgeon and anthropologist
- It is used to cure psychological disorders by administrating insulin.

Which of the following can increase the likelihood of occurrence of a behavior?

- Extinction
- Reinforcement
- Punishment
- Insight

Identify where we stop reinforcement and behavior extinguishes.

- Generalization
- Extinction
- Spontaneous recovery
- Shaping

## Most Important & Repeated Mcqs Midterm PSY101

Which of the following law is given by Thorndike that all responses followed by satisfaction are stamped into an individual and he learns those responses?

- Law of exercise
- Law of effect
- Law of insight
- Law of belongingness

Which perspective of psychology emerged out of a desire to understand the conscious mind, free will, human dignity, and the capacity for self-reflection and growth?

- Humanistic
- Behavioral
- Gestalt
- Psychodynamic

Which of the following process is suggested by Bandura that help human behavior to learn?

- Intention
- Observation
- Insight
- Reinforcement

Fatima is using newspaper records to study the rate of crime during the past 20 years. Which type of method is she utilizing?

- Participant Observation
- Structured Observation
- Field experiments
- Archival data

Gene that only influences the expression of a trait when paired with an identical gene is known as what?

- Dominant
- Mutated
- Recombinant
- Recessive

## Most Important & Repeated Mcqs Midterm PSY101

Which of the following is the correct order for Piaget's four stages of development?

- Preoperational, sensory-motor, concrete operations, formal operation
- Concrete operations, preoperational, sensory-motor, formal operation
- **Sensory-motor, preoperational, concrete operations, formal operation**
- Preoperational, concrete operations, sensory-motor, formal operation

Which of the following is a scan showing biochemical activity within the brain at any given moment?

- CAT
- MRI
- EEG
- **PET**

Which of the following statement best describes "Hormones"?

- The male gonads
- Chemicals found in the synaptic vesicles, which when released have an effect on the next cell
- **Chemicals released into the bloodstream by the endocrine glands**
- The female gonads

What do we call thyroid enlargement?

- Vitamin deficiency goiter
- Calcium deficiency goiter
- Protein deficiency goiter
- **Iodine deficiency goiter**

Which part of the eye is a muscle that regulates the size of the pupil?

- **Retina**
- Sclera
- Iris
- Lens

## Most Important & Repeated Mcqs Midterm PSY101

Which type of hearing problem can be reduced with ordinary hearing aids?

- Central deafness
- Auditory pathway deafness
- Conduction deafness
- Sensory-neural deafness

In Watson's experiment, when little Albet was being conditioned to the fear of a rat, afterwards he used to be afraid of cotton balls as well. This concept is known as what?

- Stimulus generalization
- Extinction
- Spontaneous recovery
- Higher order conditioning

A child overcomes her fear of snakes by observing another child repeatedly handle snakes. This is an example of which of the followings?

- Cognition therapy
- Systematic desensitization
- Modeling
- Contingency contracting

Cognitive approach emphasizes on all of the followings EXCEPT:

- Feelings
- Thoughts
- Thinking
- Genetic makeup

Which of the following approach's main assumption is that "Human beings are capable of shaping their own destiny"?

- Psychoanalytic
- Behavioral
- Humanistic
- Existential

## Most Important & Repeated Mcqs Midterm PSY101

Who gave the theory of “humors”?

- Hippocrates
- Plato
- Socrates
- Kraepelin

Concepts that have unique sets of traits and features, easy to define and elaborate are known as what?

- Artificial concepts
- Natural concepts
- Prolonged concepts
- Prototype concepts

Relaxation exercises and meditation are the examples of what?

- Mental images
- Schema
- Concepts
- Ideas

In which of the following need a person has a tendency to seek impact, control, or influence over others?

- Arousal
- Achievement
- Affiliation
- Power

Learning approaches are primarily based upon the principles of all of the followings EXCEPT:

- Classical Conditioning
- Operant Conditioning
- Gestalt Principle
- Cognitive Learning

## Most Important & Repeated Mcqs Midterm PSY101

Which part of brain helps in expression through tone of voice and by controlling facial expression?

- The left hemisphere
- Limbic system
- **The right hemisphere**
- Cerebrum

Hunger, thirst and sleep are what?

- Learnt motives
- **Primary motives**
- Social motives
- None of the given options

The ABC model suggests that an attitude has three components. Which of the following is not one of them?

- Affect
- **Perception**
- Behavior
- Cognition

According to "Theory of Emotions" given by Albert Ellis, emotions do not result from a single cause but originate from different ways. In this regard, all of the followings were identifies by Albert Ellis EXCEPT:

- Sensory- motor
- Bio-chemical stimulation
- **Reflex action**
- Cognitive and thinking processes

Who amongst the following used apes in his experiments for knowing the use of insight by animals in problem solving?

- J. B. Watson
- **Wolfgang Kohler**
- B. F. Skinner
- Jean Piaget

## Most Important & Repeated Mcqs Midterm PSY101

Skinner used which of the following technique that means start reinforcing a behavior that is the first toward final behavior and then gradually reinforce successively closer approximations to the final behavior.

- Modeling
- Shaping
- Assertion
- Aversive

Learning to play a Piano is an example of which of the following?

- Shaping
- Classical conditioning
- Generalization
- Learning by insight

Human behavior is determined by the environment. This was proposed by which of the followings?

- Behaviorists
- Humanists
- Psychoanalysts
- Cognitivists

Which of the following is a rule; if it is applied, ensures the solution to the problem?

- Heuristics
- Algorithms
- Both heuristics and algorithms
- Logrithm

A Skinner box is most likely to be used in research on \_\_\_\_\_.

- Classical conditioning
- Cognitive learning
- Operant conditioning
- Vicarious learning

## Most Important & Repeated Mcqs Midterm PSY101

If reinforcement is withheld the response rate of the child declines and finally no response is shown by the child, This will be an example of which of the following?

- Reward
- Shaping
- Extinction
- Acquisition

Who among the following gave the Cognitive Appraisal Theory of emotions?

- Richard Solomon and John Corbit
- Richard Lazarus
- Albert Ellis
- Cannon-Bard

All of the following statements concern with the concept of learning EXCEPT:

- Learning is relatively permanent
- Learning involves experiences
- Learning is another word for physical growth
- Learning involves changes in behavior

Which of the following is a desire, instinct or need that speeds up our behavior towards some goal?

- Motivation
- Vulnerability
- Learning
- Tendency

Which of the following is NOT a type of learning?

- Verbal learnin
- Problem solving
- Motor learning
- Synchronicity

## Most Important & Repeated Mcqs Midterm PSY101

In which of the following type of learning; person's own association, experiences and relations with the phenomenon has been involved?

- Verbal learning
- Problem solving
- Motor learning
- Audio learning

Cognitive approach emphasizes on all of the followings EXCEPT:

- Thoughts
- Feelings
- Thinking
- Genetic makeup

The investigator. For example, if a person was angry, they would report all of their experiences during the time they were angry.

- Empiricism
- Functionalism
- Contemplation
- Introspection.

\_\_\_\_\_ is the school of thought in where psychology is defined as the study of the structure of the mind.

- Functionalism.
- Behaviorism.
- Structuralism.
- All of the above.

Which of the following is the ability to use logic, past experience, and learn information for mental processing?

- Reasoning
- Research
- Thinking
- Perception

## **Most Important & Repeated Mcqs Midterm PSY101**

The process of constructing comparable, exposure and comparison groups is called \_\_\_\_

- Time series design
- Prospective design
- Retrospective design
- **Matching**

\_\_\_\_\_ gave the concept that human capacity for learning the language is innate.

- Jean Piaget
- **Noam chomsky**
- Stanley schacter
- Tolman

\_\_\_\_\_, a French surgeon and anthropologist, discovered speech centre in brain.

- **Paul Broca**
- Philippe Pinel
- Galen
- Cabanis

Psychology is defined as the science of:

- Sensation and perception.
- Experience and mental illness.
- Culture and group dynamics
- **Behavior and mental processes.**

\_\_\_\_\_ focuses on the unconscious forces that drive or motivate human behavior.

- **Psychodynamic model**
- Functionalism
- Structuralism
- Gestalt psychology

## **Most Important & Repeated Mcqs Midterm PSY101**

The recording of the behavior of people or animals in their natural environments, with little or no intervention by the researcher is known as what?

- Experimental research
- **Naturalistic observation**
- Manipulative research
- Laboratory observation

When a detailed description of a particular individual is gathered, this sort of data collection is known as

- A single-blind study
- A representative sample
- A naturalistic observation
- **A case study**

The branch of psychology that studies how physiological and social changes take place over the lifespan is known as what?

- Forensic Psychology
- Developmental Psychology
- Clinical Psychology
- **Social Psychology**

Which of the following system is a chemical communication network that sends messages through out the nervous system via the bloodstream?

- **Endocrine**
- Neuron
- Electrical
- Central

During which stage of development, the Oedipal and Electra complex takes place?

- The Latency Period
- The Anal Stage
- The Oral Stage
- **The Phallic Stage**

## **Most Important & Repeated Mcqs Midterm PSY101**

Which of the following will happen where we stop the reinforcement and the behavior will be extinguished?

- Generalization
- **Extinction**
- Spontaneous recovery
- Shaping

Identify who among the following developed his system of psychotherapy called Client Centered Therapy

- Alfred Adler
- William. H. Sheldon
- Albert Ellis
- **Carl Rogers**

“The whole is greater than the sum of the parts” is a statement associated with the perspective of \_\_\_\_\_

- Introspection
- **Gestalt psychologists**
- Psychoanalysis
- Functionalism

A branch of psychology that studies the psychology in action at the workplace is known as which of the following?

- Clinical psychology
- Forensic psychology
- Health psychology
- **Industrial / Organizational Psychology**

Which of the followings model focuses on how people know, understand and think about the world?

- **Cognitive model**
- Behavioral model
- Humanistic model
- Psychodynamic model

## Most Important & Repeated Mcqs Midterm PSY101

Which of the following school of thought gave emphasis on the structure of consciousness?

- Behaviorism
- **Functionalism**
- Structuralism
- Gestalt school of thought

A detailed description of a particular individual being studied or treated is called \_\_\_\_\_

- A single-blind study
- A representative sample
- A naturalistic observation
- **A case study**

The psychodynamic perspective was based on the work of \_\_\_\_\_.

- **Freud**
- Watson
- Gestalt
- Wundt

Who was an early proponent of functionalism?

- Wilhelm Wundt
- Ivan Pavlov
- **William James**
- Max Wertheimer

Which of the following terms do NOT belong together?

- Natural selection; functionalism
- Psychoanalysis; unconscious conflict
- **Structuralism; observable behavior**
- Gestalt; whole

A variable that the experimenter manipulates is called a(n) \_\_\_\_\_.

- Control condition
- **Independent variable**
- Coefficient of correlation
- Dependent variable

## Most Important & Repeated Mcqs Midterm PSY101

Observing behavior as it happens in real-life natural settings without imposing laboratory controls is known as the \_\_\_\_\_.

- Naturalistic observation method
- Experimental method
- Psychometric approach
- Survey method

Who claimed that behavior is affected by positive reinforcement?

- B. F. Skinner
- Sigmund Freud
- William James
- Wilhelm Wundt

A researcher accessed information on the Internet from a series of surveys of women that was conducted during the 1970s and 1980s. The data were analyzed to examine changes in attitudes and behaviors over time. Which of the following method was used?

- Participant observation
- Case study
- Archival data
- Field experiments

A researcher wants to study the effects of violence displayed in movies on children behavior. In this research violence displayed in movies is the \_\_\_\_\_ variable as it is manipulated by the experimenter.

- Independent
- Dependent
- Confounding
- All of the given options

John B. Watson believed that psychology should involve the study of \_\_\_\_\_.

- Consciousness
- The brain
- The mind
- Behavior

## Most Important & Repeated Mcqs Midterm PSY101

Tahir often experiences intense feelings of anger and frustration. In order to cope with these feeling, he enrolls in a kickboxing class as an outlet for his emotions. Tahir's actions are an example of which type of defense mechanism?

- Projection
- Displacement
- Repression
- **Sublimation**

Which type of learning process did Burrhus Frederic Skinner describe?

- Classical Conditioning
- Modeling
- Observational Learning
- **Operant Conditioning**

\_\_\_\_\_ refers to genetic composition of a person.

- **Genotype**
- Phenotype
- Monotype
- None of the given options

Dr. Usman studies the diagnosis, causes, treatments, and prevention of mental illnesses. Which type of psychologist is Dr. Usman?

- **Clinical psychologist**
- Developmental psychologist
- Forensic psychologist
- Health psychologist

Which one of the following models believes that behavior is motivated by inner forces over which individuals have little control?

- Cognitive model
- **Psychodynamic model**
- Humanistic model
- Behavioral model

## Most Important & Repeated Mcqs Midterm PSY101

Which one of the following schools of thought focused on what the mind does and how it does?

- Structuralism
- **Functionalism**
- Gestalt
- Behaviorist

Which one of the following drugs is a stimulant?

- **Nicotine**
- Lorazepam
- Barbiturates
- LSD

The branch of psychology that studies cognition, and related areas issues are called \_\_\_\_\_.

- Forensic psychology
- **Cognitive psychology**
- Counseling psychology
- Clinical psychology

In operant conditioning, \_\_\_\_\_ is necessary to create the association between the stimulus and the voluntary response.

- The law of negative effect
- A long time delay
- Conditional emotional linkages
- **Reinforcement**

Freud's psychoanalytic theory of dreaming states that \_\_\_\_\_.

- **The purpose of dreaming is to express unconscious wishes, thoughts, and conflicts**
- Dreaming is a by-product of a process of eliminating or strengthening neural connections
- The purpose of dreaming is to resolve current concerns and problems
- There is no purpose to dreaming; dreams occur because of random brain stem signals

## Most Important & Repeated Mcqs Midterm PSY101

Daydreaming, meditation, intoxication, sleep, and hypnosis are all types of \_\_\_\_\_.

- Altered states of consciousness
- Waking consciousness
- Self-awareness
- Self-absorption

The branchlike structures that receive messages from other neurons are called \_\_\_\_\_.

- Nerve bundles
- Dendrites
- Axons
- Synapses

Which of the following statement best describes the concept of an illusion?

- It is due to the action of the rods versus the cones in the retina
- Corresponds directly to something that you dreamed
- It is the same thing as a vision
- It is a perception that does not correspond to reality

All of the following statements concern with the concept of learning EXCEPT:

- Learning is relatively permanent
- Learning involves experiences
- Learning is another word for physical growth
- Learning involves changes in behavior

The peripheral nervous system consists of \_\_\_\_\_.

- The spinal cord and autonomic system
- All nerves in the brain and the spinal cord
- The brain and the autonomic system
- All the nerve cells that are not in the brain and spinal cord

The fovea is made up of what?

- All cones and no rods Fovea
- Mostly cones with some rods
- All rods and no cones
- Mostly rods with some cones

## Most Important & Repeated Mcqs Midterm PSY101

What are the hammer, anvil, and stirrup?

- Types of sound that most people can detect
- Tiny bones located in the middle ear
- Types of cones on the retina
- Words often used by audiologists in testing for hearing difficulties

J.B. Watson talked about three main emotions anger, love and \_\_\_\_\_.

- Disgust
- Fear
- Sadness
- None of the above

According to Piaget, children's thinking develops through two simultaneous processes. Identify them.

- Assimilation and accommodation
- Assimilation and mental representation
- Mental representation and equilibrium
- Equilibrium and accommodation

Which of the following statement best describe Erik Erikson?

- He was an id psychologist
- He developed a theory based on social rather than sexual relationships
- He described archetypes
- He gave the concept of basic anxiety

\_\_\_\_\_ was the first to use the term "Mental Test" for devices used to measure intelligence.

- Galton
- Cattell
- Thorndike
- None of the above

## Most Important & Repeated Mcqs Midterm PSY101

Binet and Simon were \_\_\_\_\_ scientists. They were the first to measure intelligence formally.

- German
- American
- French
- None of the above

Cole and Hass gave the idea of \_\_\_\_\_.

- Social Intelligence
- Moral Intelligence
- Emotional Intelligence
- None of the above

Structures of consciousness, according to psychodynamic approach, are conscious, subconscious, \_\_\_\_\_ and unconscious.

- Super conscious
- Hyperconscious
- Non conscious
- None of the above

The therapy based upon \_\_\_\_\_ theory is too time consuming and therefore expensive.

- Psychodynamic
- Psycho social
- Trait
- None of the above

\_\_\_\_\_ described personality in terms of two major dimensions.

- Cattell
- Eysenik
- Adler
- None of the above

## **Most Important & Repeated Mcqs Midterm PSY101**

Who was the founder of REBT?

- Allbert Ellis
- Aron beck
- Albert Einstein
- Aron Feldr

Which one is NOT a type of schizophrenia?

- Disorganized type
- Catatonic type
- Paranoid type
- Differentiated type

Name the concept when there is a feeling of integration between the self and ideal self.

- Empathy
- Respect
- Congruence
- Genuinenes

If a man experiences chest pains while at a department store, and later experiences anxiety attacks when visiting department stores, this can be explained by what type of learning?

- Operant
- Classical conditioning
- Observational
- Vicarious

Social phobia is characterized by \_\_\_\_\_.

- A fear of people
- A fear of rejection
- A fear of social situations
- A fear of social isolation
