

Ali is working as a research assistant in a company. A Research officer assign him task to develop interview questions, plan to keep them short, straightforward and avoid asking too many. Write the five guidelines which Ali should follow to accomplish assigned task.

Suppose you are an HCI specialist, what do you think that evaluation of design or product is beneficial? Justify your point of view in five lines.

**Answer:-**

HCI specialists test design ideas on real users and use formal evaluation techniques to replace intuition in guiding design. This constant reality check improves the final product.

To most effectively develop programs and products designed to meet customer needs, all operations are strongly science based. For example, our research and development teams emphasize improving rearing methodologies for current and new products, designing consistently significant quality control evaluations, improving natural enemy delivery methodologies and developing technologies for field population monitoring. Our science-based efforts are the best means to achieve and maintain the highest standards of program and product quality.

1. Problems are fixed before the product is shipped, not after.
2. The team can concentrate on real problems, not imaginary ones.
3. Engineers code instead of debating.
4. Time to market is sharply reduced.
5. Finally, upon first release, your sales department has a rock-solid design it can sell without having to pepper their pitches with how it will all actually work in release 1.1 or 2.0.

Suppose you are a practitioner of visual art and visual design. Justify how visual art is different from visual design?

Visual Art	Visual Design
<ul style="list-style-type: none"><li>• Visual art is art such as paintings, photographs, sculptures,</li><li>• The term visual art separates those kinds of art from music, dance, and drama.</li><li>• It is two-dimensional. Visual arts are things like paintings, drawings, visual designs, photography, and computer art.</li><li>• There is no "designing" for a purpose; it's just creating something visually appealing.</li></ul>	<ul style="list-style-type: none"><li>• Visual design</li><li>• is the way a piece of artwork, a room, yard, video game, photo or other artistic subject is composed and appeals to the human eye</li><li>• Photoshop designs for each page, page type, module within an app/site/software.</li><li>• Creates or contributes to style guides detailing how everything looks and how it fits into the larger strategy.</li></ul>

Match Column A with column B.

Column A	Column B
I. Storyboarding	1. Devise your own symbols and icons for elements you might want
II. Sketching	2. Series of sketches showing how a user might progress through a task

Answer:

Match Column A with column B.

Column A	Column B
I. Storyboarding	1. Devise your own symbols and icons for elements you might want
II. Sketching	2. Series of sketches showing how a user might progress through a task using the device being developed
III. Prototypes	3. Primary actions and pathways through the interface that the persona takes with the greatest frequency, often on a daily basis.
IV. Key path scenarios	4. Answer questions and support designers in choosing between alternatives
V. Principles and patterns	5. Add a bottom-up approach to balance the Process and can be used to organize elements at all levels of

Imagine you want to find a book with a red cover, or one that discusses HCI artifacts and book has effective navigation approaches. Which retrieval method you will use here to find book in your computer and why ?

Why Schedule and budget constraints are important in evaluation process? Give at least two reasons.

1. Planning evaluations that can be completed on schedule is also important, particularly in commercial settings.
2. Time and budget constraints are important thoughts to keep in mind. It might seem ideal to have 10-20 users test our interface. But if we need to pay them, then it could get costly

All users do mistakes while doing work on computers. In your point of view which tool allows the user to reverse one or more previous actions if he/she decides to change his/her mind in software user interface?

Answer:

Human Computer Interaction (CS408)

Question: 45 (Marks: 3)

Attempted Questions: 18 Total Questions: 52

Fatima is an interface designer and use patterns in order to reduce design time. Which patterns she will applied at conceptual level and to solve information management problems?

Answer: She will applied interaction design pattern, because interaction design pattern represent both the capture and formalization of design knowledge, which can serve a lot of purposes e.g.  
Reducing design time and effort on new projects and educating designers new to a project etc.

Point out the problem with excise tasks.

The problem with excise tasks is that the effort we expend in doing them doesn't go directly towards accomplishing our goals. Where we can eliminate the need for excise tasks, we make the user more effective and productive and improve the usability of the software.

Answer:

Give the names of two software tools that can be used for creating prototypes.

If you are to build a prototype in software, then clearly you need a software tool to support this. Common prototyping tools include Macromedia Director, Visual Basic, and Smalltalk. These are also full-fledged development environments, so they are powerful tools, but building prototypes using them can also be very straightforward.

What does PARC stands for?

Palo Alto Research Center

Suppose you are an interface designer, write any two principles that can help you to make your visual interface as easy and pleasurable to use as possible.

Avoid visual noise and clutter

- Use contrast, similarity, and layering to distinguish and organize elements
  - Provide visual structure and flow at each level of organization
  - Use cohesive, consistent, and contextually appropriate imagery
  - Integrate style and function comprehensively and purposefully
-

\_\_\_\_\_ is the least technical way of collecting data but it can be difficult and tiring to write and observe at the same time.

Choices:

Taking notes

Correct answer solved by Hadi  
Email : usmanraj20@gmail.com  
Cell no: 03228043306

Observation

Video

Audio recording

Scenario content and context are derived from information gathered during the \_\_\_\_\_ phase and analyzed during the \_\_\_\_\_ phase (respectively)

Choices:

Modeling, implementation

Modeling, requirement

Research, implementation

Research, modeling
