CS205 Quiz 3 File by Tanveer Online Academy

As per cis which authentication protocols should be used by wireless networks?	Which require digital certificates for authentication
Which screen is displayed immediately after login screen in NISSUS scanner?	Dashboard
Which of the following tools are offered free by QUALYS?	Browser check
What practice of VM scanning mostly organizations follow in our local market?	Quarterly scan and remediate
Against which frameworks NISSUS scanner gives configuration auditing feature?	CIS and DISA
What should a system do whenever an administrator account is added or removed?	Issue a log entry and alert
Which team tests the patches in test environment in vulnerability management process?	IT operations team
Which cloud storage should be allowed to use in organization as per cis?	Authorized cloud storage
What feature set QUALYS scanner offers?	Cloud-based service
The dedicated machine used by administrators for administrative tasks should have following features.	Isolated from the organization's primary network

Which of the following tools can be used to enforce access controls to data?	Host-based data loss prevention (DLP)
Which of the following can be used to block malicious traffic on organization's network boundaries?	Network-based intrusion prevention (IPS) system
What type of machine should network administrators use for administrative tasks?	Isolated from the organization's primary network
Which of the following cis critical control is discussed in this module?	Secure configuration for network devices
Which of the following statement is correct?	NVD is superset of CVE
As per boundary defense control of cis what should be done with network traffic at proxy?	Decrypt all encrypted network traffic prior to analyzing the content
Which policy is recommended by data protection control of cis for mobile devices usage in an organization?	Hard drive of mobile devices should be encrypted
Which of the following function is performed by IT operation team in vulnerability management process?	Run vulnerability scanner
In which mode should vulnerability scanning be performed?	Authenticated mode
Which team tests the patches in test environment in vulnerability management process?	IT operations team
why security engineering is placed at layer 3 of transformation model?	Consists of complicated security activities which take more time and effort
Which of the following are considered cumulative and product specific?	Security patches, Service packs

What feature set QUALYS scanner offers?	Cloud based service
Which of the following tools are offered free by QUALYS?	Browser check
Which best practices are to be followed for applying security patches?	A good change control procedure and working backup
How many TCP and UDP ports are scanned in a default scan?	65, 535 TCP ports
Which activities are carried out at stage 1 of transformation model?	All of the given
Continuous monitoring feature of QULAYS is very useful for?	Vulnerability management of assets
In an enterprise which software should be allowed to install and execute?	Softwares included in white-list.
What is the first step in running a policy compliance scan through qualys?	Build a policy
What practice of VM scanning mostly organizations follow in our local market?	Monthly scan and remediate
How many individuals were affected in anthem insurance breach 2014?	78.8 million
Automated configuration monitoring tools should compliant with which protocol to streamline reporting?	Scap
Which of the following scan is deeper and gives more detailed scanning results?	Credentialed vulnerability scanning
Anthem insurance breach 2014 was initiated through?	Phishing email
Which best practices are to be followed for applying security patches?	A good change control procedure and working backup
Which of the following statement is correct?	NVD is superset of CVE
What should standard secure configuration images represent?	Hardened versions of underlying OS and application installed on system.
What is the first step in running a policy compliance scan through qualys?	Build a policy
Which of the following tools are offered free by QUALYS?	Browser check
How security of outsourced services can be evaluated?	Include outsourced scope in internal audit

As per carnegie mellon university computing consortium commercial software contains?	20 to 30 bugs for every 1000 lines of code
Which of the following modules are displayed on home screen of qualys trial version?	Vulnerability management and policy compliance
Which types of plugins are supported by NISSUS scanner?	CIS and DISA
Which subscription service model QUALYS offers?	Annual subscription
What information we get from open TCP and UDP ports?	Which services are running on host
Which of the following are common vulnerability scanners?	Nessus, rapid7, Openvas & qualys
Which of the following policies NISSUS can scan for compliance?	CIS benchmarks
