sta 641 k paper m

3 questions spss k krny thy (\bar{x} chart or range \bar{x} bar) (t test) or 1 excel ka

tha (mean, standard deviation or coleration find krna tha null or alternative

hypothesis given thi)

STA641 Current Paper | 11-09-2020

total Question 5 and all questions Subjective and every question carry 10 marks total marks 50

Q1 : Find mean median mode in spss and define it skewness or symmetric?

Q2: find correction and linear regression in ms excel file?

Q3: draw Q-Q port in ms excel

Q4: what is value of UCL and LCL? Draw chart? Mean? What is control line? Is it given data uper control or outer control?

Q5: apply T-test sample paired test and stander derivation and mean? What is value of T test?

In all questions ka data diya hoa tha table ma and youtube pa STA641 ka 2018 ka papr solve ki hoe video hai wo lazmi kry un method sy 2 question ay hai and is k alawa sta641 ki assignment revise kr ly and Z-test bi lazmi kryn

3 Excels question...

1. midpoint, relative frequency, %age relative frequency, histogram

2. Paired mean t testing

3. Correlation and regression...

2 questions in SPSS

4. T testing for equal variance

5. Mean , median, mode and skewness of data
