Question No:1

What is the difference between kinetic and static friction?

Answer:

1.Static friction: The friction that exists between two surfaces that are not moving relative to each other. 2.Kinetic friction: The friction that exists between two surfaces that are moving relative to each other.

Question No: 2

What is flux in Physics?

Answer:

The word flux has many meanings, but in physics flux is the "rate of flow" of some quantity through an area. The thing "flowing" could be a fluid (like air or water), some form of energy (like heat, light, or radio waves), or a field (gravitational, electric, or magnetic). In the case of fields, however, the idea of "flow" is more poetic
